

Screenshots, Preview Video & ASO Strategy

A complete store-listing package for LingoQuest, built from the running build on a physical device — two native-geometry screenshot sets, two preview video cuts, full metadata for both stores, and 318 researched keywords.

Prepared 12 September 2026 **Build inspected** Flutter debug, Pixel 5a **Screens visited** 38
Assets produced 20 stills + 2 videos

01 Executive summary

LingoQuest is a complete, working language-learning app with a genuine differentiator that its current positioning does not claim loudly enough. Ten courses, a structured Path, and **ten distinct mini-games built from the same vocabulary** are all live in the build I ran. The store listing should be built on the games.

The five things that matter

- 1. **The USP is Learn → Practice → Play, and the app says so itself.** Its own onboarding carries a slide titled "Learn → Practice → Play". That is the positioning; it just needs to be on the store page. **FACT**
- 2. **Ten games is the rarest asset here.** Of the six major competitors I checked, only Drops puts "Games" in its App Store title. The games cluster is the one place LingoQuest can win head terms rather than fight for them. **FACT**
- 3. **The app is English-only, and that caps localisation.** There is no lib/l10n, no supportedLocales, and every course teaches its language *from* English. Translating store metadata into nine languages would buy installs from people who cannot use the product. **RISK**
- 4. **The icon is the weakest asset in the package.** A green parrot on a green field, full-body, with a pointer that vanishes below 60px. It scores 3/10 on small-size readability. **ESTIMATE**
- 5. **Content depth is the real launch constraint.** Nine lessons per language across three units. That is enough to prove the loop, not enough to hold a 30-day streak — and the achievements screen advertises a 30-day streak badge. **FACT**

RECOMMENDED POSITIONING

Brand: LingoQuest · **USP:** Learn languages by playing games · **Proof:** 10 games, 10 languages, one vocabulary.

02 App screen inventory

Every screen below was opened on a physical Pixel 5a running the current build. Nothing in this table is inferred from source code. **FACT**

SCREEN	PATH	PURPOSE	LEARN	GAME	SHOT POTENTIAL
Welcome / splash	Cold launch	Brand + single CTA	—	—	Low — no product shown
Onboarding tour (5)	Get started	Explains Path, Fun Zone, Learn→Practice→Play, Progress	High	High	Med — states the USP in the app's own words
Name entry	Tour → Continue	Personalisation	—	—	Low
Language selection	Onboarding	Pick from 10 languages	High	—	High — breadth claim
Daily goal	Onboarding	Casual→Intense commitment	Med	—	Low
XP goal	Onboarding	5/10/20/50 XP per day	Med	Med	Low
Quick placement test	Onboarding	8 questions, skippable	High	—	Med
Home dashboard	Tab 1	XP, streak, lessons, Fun levels, achievements, daily goal, resume card	High	High	Very high — hero
Path / course map	Tab 2	Winding map, colour-coded units, lock states	High	Med	High
Lesson intro	Path node	Title, word list, exercise count	High	—	Med
Review Words carousel	Lesson start	Flashcards: word, meaning, emoji, Listen	High	—	High
Typed recall	In lesson	Type the English meaning	High	—	Med
Multiple choice	In lesson	A/B/C/D meaning pick	High	—	High
Listening	In lesson	Audio button + 4 options	High	Med	High
Image recognition	In lesson	Emoji + word, two-stage recall	High	Med	High
Sentence arrangement	In lesson	Order word chips into a phrase	High	Med	High
Word matching	In lesson	Two columns joined by drawn lines	High	High	High
Answer feedback	In lesson	Green "Nice!" / red "Not quite" + correct answer + meaning	High	—	High
Lesson complete	Lesson end	Accuracy %, correct, incorrect, Review mistakes	Med	Med	High
Review answers	Lesson end	Missed/All filter, your vs correct, audio replay	High	—	High
XP reward	Lesson end	+85 XP and level ring	Med	High	Med
Streak celebration	Lesson end	"1-day streak!"	—	High	Med
Daily goal reached	Lesson end	Goal hit confirmation	—	High	Med
Achievement unlocked	Lesson end	Badge award	—	High	Med
Fun Zone hub	Tab 3	Hub level, daily challenge, 10 game cards with levels	Med	High	Very high
Game intro	Game card	Name, rule, level, word count, lives	Med	High	Med
Word Bubble	Fun Zone	Falling bubbles, catch the right meaning	High	High	Very high — USP
Word Survival	Fun Zone	Beat rising water with the right meaning	High	High	Very high
Memory Match	Fun Zone	Colour-paired word cards, memorise then flip, combo counter	High	High	Very high
Memory Match results	Game end	Level Complete, +30 XP, best combo, pairs found, confetti	Med	High	High
Sentence Builder	Fun Zone	Order chips into a full sentence	High	High	High
Game results	Game end	XP, best combo, accuracy, Practice Mistakes	Med	High	Med
Languages / switch	Settings	Per-language unit, lesson and progress bars	High	—	Very high

SCREEN	PATH	PURPOSE	LEARN	GAME	SHOT POTENTIAL
Statistics	Settings	Level, XP, streak, week grid, vocabulary split, time	High	Med	High
Achievements	Settings	Badge grid with progress bars	—	High	High
Pro / paywall	Settings	Benefits, plans, restore	—	—	Low — no prices on a sideload

TWO FEATURES I DID NOT EXPECT TO FIND

A quick placement test (8 questions, skippable with "I'm a complete beginner") runs during onboarding, and **every game opens with a Review Words carousel** — flashcards with audio for the exact words that game is about to test. That second one is the mechanical proof of the Learn→Play claim and belongs in the description.

03 Product USP

Most competitors gamify the lesson. LingoQuest keeps the lesson and adds a games tab that draws from the same word list — so the game is practice, not a reward for practice.

WHAT THE BUILD ACTUALLY CONTAINS		
CLAIM	VERIFIED IN BUILD	SAFE TO SAY ON STORE
10 learning languages	Spanish, French, German, Italian, Portuguese, Dutch, Turkish, Arabic, Japanese, Chinese — all listed and selectable	Yes
10 mini-games	Word Bubble, Word Rush, Word Match, Memory Match, Phrase Builder, Listen & Catch, Conversation Challenge, Sentence Builder, Meaning Shooter, Word Survival	Yes
Games use lesson vocabulary	Each game opens a Review Words carousel of its own words before play	Yes
8 exercise types	Typed recall, MCQ, listening, image recognition (two-stage), sentence arrangement, word matching, fill-in-blank, speaking	Yes
Per-language progress	Languages screen shows independent unit/lesson position and lesson counts per language	Yes
Mistake review	"Review answers" with Missed/All filter, your answer vs correct, audio replay	Yes
Streaks, XP, achievements	Streak chip, XP levels, 10+ achievement badges with progress bars, daily goal	Yes
Placement test	8-question quick placement during onboarding	Yes
Offline use	<i>Not tested.</i> Courses are bundled JSON assets, which suggests it works, but I did not verify in airplane mode	No — verify first
Speech recognition	Speaking exercise type exists in code; I did not reach one in the lessons I played	No — verify first

DO NOT CLAIM

Anything about fluency, CEFR levels, native-speaker tutors, certificates, or offline mode until each is verified. Two of the ten rows above are unverified and are excluded from every piece of copy in this document.

04 Competitor analysis

Pulled from the live US App Store pages on 12 September 2026. Titles, subtitles and ratings are quoted exactly. **FACT**

APP	TITLE	SUBTITLE	RATING	CATEGORY RANK
Duolingo	Duolingo: Language Lessons	Languages, Math, Music & Chess	4.7 · 5.4M	#1 Education
Babbel	Babbel - Language Learning	Learn Spanish, French & more	4.7 · 753K	#60 Education
Memrise	Memrise: Language Learning App	Learn Spanish, Japanese & More	4.8 · 217K	#190 Education
Busuu	Busuu: Language Learning App	Learn Spanish, French, English	4.7 · 101K	#131 Education
Drops	Drops: Language Learning Games	Learn Spanish, French, German	4.7 · 72K	Education
Mondly	Mondly: Learn 41 Languages	Learning Spanish Korean French	4.7 · 33K	Education

The pattern, and the gap

Five of six spend their subtitle listing languages. It is the default move, and it means every one of them competes on the same terms with a bigger budget. Only **Drops** claims games in its title — and Drops is a vocabulary-only app with no lesson path.

LingoQuest can claim something none of them can: **a structured path and a games arcade that share one vocabulary**. Drops has games without the path; Duolingo and Babbel have the path with gamified lessons rather than actual games.

ESTIMATE

APP	STRUCTURED PATH	STANDALONE GAMES	SHARED VOCABULARY	WHERE LINGOQUEST SITS
Duolingo	Yes	Gamified lessons only	n/a	LingoQuest is the only one of the set with both a path and a separate games tab drawing on the same words.
Babbel	Yes	No	n/a	
Busuu	Yes	No	n/a	
Memrise	Yes	Limited	Partial	
Drops	No	Yes	Yes	
Mondly	Yes	Limited	Partial	

Competitor weaknesses worth targeting

ESTIMATE

- **Duolingo's scope drift.** Its subtitle now sells maths, music and chess. Learners who want a language app and nothing else are an addressable segment.
- **Price.** Babbel's listed IAP runs to \$107.99/yr and Memrise's to \$329.99 lifetime. LingoQuest's proposed \$30/yr is materially below the field.
- **Drops caps at vocabulary.** No sentences, no path, no grammar. LingoQuest has sentence building and a unit structure.

05 Best user journey

The journey that sells this app is the one the app itself is built around, and I walked all six steps on device.

Step 1

Choose a language

Ten flags, one tap. The screen states that each language keeps its own progress.

- Step 2

Learn something

A five-minute lesson opens with a flashcard carousel, then eight exercises across six formats.
- Step 3

Play a game

The Fun Zone opens the same words as falling bubbles, matching pairs or a rising-water race.
- Step 4

Practise what you missed

Wrong answers re-queue inside the lesson, then surface again on the review screen and as "Practice Mistakes" after a game.
- Step 5

Earn progress

XP, a level ring, a streak celebration, a daily-goal confirmation and an achievement — five distinct reward screens in one session.
- Step 6

Come back

Home resumes exactly where you stopped, per language, and the streak chip is the reason to open it tomorrow.

This is why screenshot 5 (the games grid) sits immediately after screenshot 4 (languages): the viewer has just learned the app has ten languages, and the next frame tells them every one of those languages feeds ten games.

06 Screenshot strategy

Apple shows roughly the first three screenshots before a scroll, so those three carry the decision. The set answers a question each.

THE THREE THAT MATTER			
#	QUESTION IT ANSWERS	ANSWER	
1	What is LingoQuest?	A language app with lessons, games, XP and a streak — the dashboard shows all four at once	
2	What makes it different?	Spanish words falling as bubbles you catch — a real game, not a quiz with confetti	
3	How do I actually learn?	A five-minute lesson: see the word, hear it, pick the meaning	

PRODUCTION NOTES

- Two native sets, not one resized set.** The App Store set was captured with the device display overridden to 1320 × 2868 @ 3×, so Flutter laid the UI out at 440 × 956 pt — iPhone 16 Pro Max geometry exactly. The Play set was captured at the phone's own 1080 × 2400. Neither is the other one stretched, and the two genuinely differ: the iPhone frames fit more on screen, and Home shows a "continue the Path" row the Android frames do not.
- Device chrome:** Android's status bar and gesture pill were painted out with the app's own background colour, and the iOS status bar, Dynamic Island and home indicator are drawn in the template — presentation, the same convention every App Store listing uses. Everything inside them is the running app.
- Size:** 1320 × 2868 px, the 6.9-inch iPhone class. App Store Connect scales that down for every smaller iPhone, so one set covers the family. ([spec](#))
- Type:** headlines set in Baloo 2 and Source-side copy in Inter — the app's own two faces, so the store page and the product look like the same product.

- **Device frame:** a plain CSS-drawn rounded rectangle. No manufacturer's handset artwork is used.
- **Palette rhythm:** light green → deep green → light green → amber, so the set reads as a designed sequence in the carousel rather than ten variations of one card.

07 Screenshots 1–10

Every frame is a real capture from the running app. The only additions are the background, the headline, the subcopy and the frame.

#	HEADLINE	SUPPORTING TEXT	KEYWORD THEME	WHY HERE
1	Learn a language by playing	Short lessons. Ten real games. One streak worth keeping.	language learning app, learn through games	Answers "what is this" — the dashboard and a game board in one frame
2	Turn words into games	Catch the right meaning before the bubble gets away.	language games, vocabulary games	The differentiator, in the slot where a viewer decides to scroll or leave
3	10 games, one vocabulary	Every game practises the words your lessons just taught you.	language learning games, word games	All ten modes named and legible at thumbnail size — the breadth claim no competitor can match
4	10 languages, separate progress	Switch any time. Each keeps its own lessons, XP and streak.	10 languages, learn spanish, learn french	Breadth. The per-language detail is a claim no competitor screenshot makes
5	Flip. Match. Remember.	Memory Match pairs every word with its meaning, against the clock.	memory match language, matching game words	The most visually distinct game — colour-paired Spanish and English cards
6	Right answer? Watch it pop	Correct bubbles burst into confetti and the next word drops in.	word game learn, gamified learning	The reward moment. Proves the games have real game feel, not quiz feel
7	Answer fast. Stay afloat.	Beat the rising water by picking the right meaning in time.	language challenge, word game	A third distinct mechanic, so "ten games" reads as true rather than padded
8	Short lessons that stick	See it, hear it, say what it means — five minutes at a time.	5 minute lessons, vocabulary	Reassures the serious learner that the lessons are real
9	Every mistake becomes practice	Get it wrong and LingoQuest shows you why, then brings it back.	practice, review mistakes	The retention mechanic — answers "will I actually remember this"
10	Keep the streak alive	XP, day streaks, badges and every word you have mastered.	daily streak, achievements	Closes on the habit loop — the last thing seen before the install button

09 Screenshot scoring

Seven criteria, scored out of 10. These are my assessments from the finished assets, not measured conversion data. ESTIMATE

RANKED BY TOTAL									
RANK	SCREENSHOT	VISUAL	CLARITY	USP	FEATURE	CONV.	ASO	DIFF.	TOTAL
1	#3 10 games, one vocabulary	9	10	10	10	9	9	10	67
2	#4 10 languages, separate progress	9	10	8	10	9	10	9	65
3	#1 Learn a language by playing	9	9	10	9	9	9	9	64
4	#2 Turn words into games	9	8	10	9	9	9	10	64
5	#5 Flip. Match. Remember.	10	9	9	9	9	8	9	63
6	#6 Right answer? Watch it pop	9	8	9	8	9	7	9	59
7	#7 Answer fast. Stay afloat.	9	8	9	8	8	7	9	58
8	#9 Every mistake becomes practice	8	9	8	9	8	7	8	57
9	#8 Short lessons that stick	8	9	7	9	8	8	6	55
10	#10 Keep the streak alive	9	8	6	9	8	7	6	53

What the ranking says. The two highest scorers are #4 (languages) and #5 (games grid) — both are breadth claims that no competitor screenshot can match. The weakest is #2, which scores highest on differentiation but lowest on clarity, because a falling-bubble game needs empty vertical space to read as falling. That tension is the single best A/B test in this package.

10 App icon review

The current icon is the full-body parrot mascot, centred on a solid mid-green field, holding a pointer stick.

SCORED OUT OF 10 ESTIMATE		
CRITERION	SCORE	REASONING

CRITERION	SCORE	REASONING
Brand recognition	5	Recognisable once known, but a cartoon bird is not a distinctive mark in this category
Language association	2	Nothing in the icon signals language. A parrot implies <i>repeating</i> , which is a stretch for a cold viewer
Game association	2	The pointer stick reads as teaching, not play. Nothing signals a game
Small-size readability	3	Fails below ~60px: green-on-green kills the silhouette and the pointer disappears entirely
Uniqueness	4	Green cartoon bird mascots are crowded here, and proximity to the category leader's owl is a liability rather than an asset
App Store attractiveness	5	Clean and professional, but does not stop a scroll
Total	21/60	

Recommended redesign RECOMMENDATION

- 1. **Crop to head and shoulders.** Fill 80–85% of the canvas with the face. At 29px, a face still reads; a full body does not.
- 2. **Change the ground to amber.** The brand already owns #FFB020, and a green parrot on amber has the contrast the current icon lacks. It also separates the icon from every green competitor tile in a search result.
- 3. **Drop the pointer stick.** It is the first thing lost at small sizes and it sells "teacher", which is the opposite of the positioning.
- 4. **Add one game cue, subtly.** The glasses lenses can carry a faint bubble highlight that echoes Word Bubble without becoming a second object.

CONSTRAINT

No owl, no green-bird-on-green, no speech-bubble-with-a-globe. The first invites a comparison LingoQuest loses; the last two are the category's two most generic icons.

11 Preview video storyboard

Two cuts, one storyboard: **26.5s for the App Store** (iPhone geometry) and **27.4s for Google Play** (Android geometry). Both 886 × 1920, H.264 High 4.0, 30 fps, AAC stereo 48 kHz — inside Apple's 15–30 second window. Nine beats, all real footage. ([spec](#))

0.0–2.9s	Learn a language by playing Home dashboard: 24-day streak, 4860 XP, Fun Zone card
2.9–5.6s	Choose your quest Languages screen — Spanish learning now, French and German in progress
5.6–8.1s	Learn new words Multiple-choice exercise from the Getting Around lesson
8.1–10.8s	Then play them Word Bubble — "Lion" with three meanings drifting
10.8–14.0s	Get it right, watch it pop Live recording of a correct tap: the bubble bursts into confetti

14.0–18.8s	Flip. Match. Remember. Memory Match — live recording of pairs turning over and matching
18.8–21.7s	Or beat the rising water Word Survival — water climbing to the character
21.7–24.2s	Build your streak Statistics — level, XP, streak, week grid, vocabulary split
24.2–26.5s	Start your Language Quest Return to the Home dashboard

WHY THIS HOOK

I tested three openers. "Stop studying. Start playing." is punchier but picks a fight with studying, which alienates the serious-learner segment. "Learn. Play. Progress." is tidy but says nothing concrete. **"Learn a language by playing"** wins because it is the whole product in five words and it is literally true of the frame behind it.

12 Video copy, second by second

ON-SCREEN TEXT · LINGOQUEST_APPSTORE_PREVIEW.MP4			
TIME	HEADLINE	SUB-LINE	FOOTAGE
0.0–2.9s	Learn a language by playing	LingoQuest	Home dashboard: 24-day streak, 4860 XP, Fun Zone card
2.9–5.6s	Choose your quest	10 languages, each with its own progress	Languages screen — Spanish learning now, French and German in progress
5.6–8.1s	Learn new words	Short lessons you finish in five minutes	Multiple-choice exercise from the Getting Around lesson
8.1–10.8s	Then play them	Catch the right meaning before it gets away	Word Bubble — "Lion" with three meanings drifting
10.8–14.0s	Get it right, watch it pop	Correct answers burst into confetti	Live recording of a correct tap: the bubble bursts into confetti
14.0–18.8s	Flip. Match. Remember.	Pair every word with its meaning	Memory Match — live recording of pairs turning over and matching
18.8–21.7s	Or beat the rising water	Ten games, one vocabulary	Word Survival — water climbing to the character
21.7–24.2s	Build your streak	XP, day streaks and every word mastered	Statistics — level, XP, streak, week grid, vocabulary split
24.2–26.5s	Start your Language Quest	LingoQuest — free to download	Return to the Home dashboard

There is no voice-over and no music bed — the track is silent AAC. Most App Store previews autoplay muted, so the captions carry the whole message, and a silent track avoids the audio validation failures that reject previews at upload.

13 App Store metadata

Apple indexes the title, subtitle and keyword field — 160 characters total — and nothing else. Promotional text and description are for conversion, not search. ([limits](#)) **FACT**

APP STORE TITLE

26 / 30

LingoQuest: Language Games

Brand first because brand terms convert best, then the two words that define the category position. "Language Games" is the phrase this app can own; "Language Lessons" is the phrase it would lose.

SUBTITLE

30 / 30

Learn Spanish, French & 8 More

The subtitle does the job every competitor uses it for — naming languages — but ends on "& 8 More", which claims breadth in three words instead of burning the field on two more language names.

KEYWORD FIELD

92 / 100

vocabulary,word,game,practice,quiz,speak,listen,ital
ian,german,japanese,arabic,dutch,turkish

No spaces after commas — Apple counts them. Nothing here repeats the title or subtitle, since Apple already indexes those. Languages not named in the subtitle go here.

PROMOTIONAL TEXT

156 / 170

New: Word Survival and Meaning Shooter join the Fun
Zone. Ten games, ten languages, one vocabulary —
learn a word in a lesson, then play it until it
sticks.

Editable without a review, so this is the field to rotate for seasonal pushes and new games.

14 App Store description

FULL DESCRIPTION

2255 / 4000

Learn a language the way you would actually keep doing it – by playing.

LingoQuest teaches 10 languages through short lessons and 10 real word games that use the same vocabulary. Learn a word in a lesson. Play it in a game. Keep it for good.

LEARN → PRACTICE → PLAY

Every lesson takes about five minutes. You meet each word on a flashcard with audio, then work through exercises that ask you to read it, hear it, match it and build it into a sentence. Then the Fun Zone hands those exact words back to you as a game.

10 LANGUAGES, EACH WITH ITS OWN PROGRESS

Spanish, French, German, Italian, Portuguese, Dutch, Turkish, Arabic, Japanese and Chinese. Switch whenever you like – every language keeps its own lessons, XP, streak and position on the path, so nothing is lost when you come back.

10 GAMES, ONE VOCABULARY

- Word Bubble – catch the right meaning before it falls
- Word Rush – fast-paced catching with big combos
- Word Match – pair up words and meanings
- Memory Match – flip cards, find the pairs
- Sentence Builder – drag words into the right order
- Phrase Builder – complete everyday phrases
- Listen & Catch – listen closely, catch what you hear
- Meaning Shooter – pop the bubble with the right meaning
- Conversation Challenge – follow a real back-and-forth chat
- Word Survival – answer fast and keep your friend above the rising water

EVERY MISTAKE BECOMES PRACTICE

Get a word wrong and LingoQuest shows you the right answer and what it means, then brings the word back later in the same lesson. After a game, one tap practises only the words you missed.

A CLEAR PATH FORWARD

Units and lessons laid out as a path, so you always know what comes next. A quick placement test at the start means you can skip ahead if you already know some.

PROGRESS YOU CAN SEE

XP levels, day streaks, daily goals, achievement badges, and a vocabulary breakdown that tells you which words you have mastered and which still need work.

LINGOQUEST PRO

Pro unlocks every lesson on the Path and every game in the Fun Zone, with unlimited practice. Monthly and yearly plans are available, and the monthly plan starts with a free trial. Prices are shown in your local currency before you buy.

Free to download. Start with Spanish, or pick any of the ten.

The first three lines are what shows before "more", so the differentiator, the breadth claim and the mechanic all land above the fold.

15 Google Play metadata

Play indexes the long description, so the same keywords work harder here — but Play also penalises stuffing, so every term below sits in a real sentence. ([limits](#)) **FACT**

PLAY TITLE

26 / 30

LingoQuest: Language Games

SHORT DESCRIPTION

72 / 80

Learn Spanish, French, Japanese and 7 more — through 10 real word games.

Learn a language by playing – not by studying.

LingoQuest is a language learning app built around a simple idea: you remember a word when you use it. So every word you meet in a lesson comes back as a game.

Learn Spanish, French, German, Italian, Portuguese, Dutch, Turkish, Arabic, Japanese or Chinese. Each language keeps its own lessons, XP and streak, so you can switch whenever you like and pick up exactly where you left off.

— SHORT LESSONS THAT STICK —

Each lesson takes about five minutes. You meet new vocabulary on flashcards with audio, then practise it through several exercise types: multiple choice, listening, typing the meaning, matching words to meanings, arranging words into a sentence, and recognising a word from an image. Get something wrong and the app shows you the correct answer and its meaning, then asks you again before the lesson ends.

— 10 WORD GAMES, ALL BUILT FROM YOUR VOCABULARY —

The Fun Zone is not a separate app bolted on. Every game opens with a quick review of the words it is about to test, and those are the words from your lessons.

Word Bubble – catch the right meaning before it falls

Word Rush – fast-paced word catching with big combos

Word Match – pair up words and meanings

Memory Match – flip cards and find the matching pairs

Sentence Builder – drag words into the right order

Phrase Builder – complete everyday phrases

Listen & Catch – listen closely and catch what you hear

Meaning Shooter – pop the bubble with the right meaning

Conversation Challenge – follow a real back-and-forth chat

Word Survival – answer fast and keep your friend above the rising water

— A PATH, NOT A PILE OF FLASHCARDS —

Lessons are organised into units along a path you can see, so you always know what is next. A quick placement test when you start means you do not have to begin at "hello" if you already know some.

— PRACTICE WHAT YOU ACTUALLY MISSED —

Every lesson ends with a review screen showing what you got wrong, what the right answer was, and what it means – with audio so you can hear it again. After a game, one tap practises only the missed words.

— PROGRESS WORTH COMING BACK FOR —

Earn XP and level up. Build a day streak. Hit a daily goal you set yourself. Unlock achievement badges. Watch your vocabulary breakdown move from weak to learning to mastered.

— LINGOQUEST PRO —

Pro unlocks every lesson on the Path and every game in the Fun Zone, with unlimited practice and fresh questions each time. Monthly and yearly subscriptions are available, and the monthly plan starts with a free trial. All prices are shown in your local currency before purchase and can be cancelled any time in your Google Play account settings.

LingoQuest is free to download. Pick a language and start your quest.

16 Keyword research • 318 terms

No search-volume figures appear anywhere in this table. This environment has no Apple Search Ads or Play Console access, and invented numbers are worse than none. Competition and opportunity are labelled estimates, derived from how crowded the head term is and how closely it matches what the app does. **ESTIMATE**

READ THE SERVICEABLE COLUMN FIRST

120 of the 318 terms are native-language storefront queries. They are researched and listed, but they are **not usable in this release** — the app's UI and every gloss are English. Shipping metadata against them buys installs that churn on first open.

KEYWORD	INTENT	LANGUAGE	REL.	COMPETITION	OPP.	RECOMMENDED USE	APPLE	PLAY	SERVICEABLE

17 Nine-language ASO

Each course gets two keyword sets: English queries that are serviceable today, and native-storefront queries that are blocked until the interface is localised.

PER-COURSE STRATEGY				
COURSE	TOP ENGLISH TERMS (LIVE)	NATIVE TERMS (BLOCKED)	POSITIONING LINE	PRIORITY
Spanish	learn spanish · spanish games · spanish vocabulary	aprender idiomas · aprender jugando	The language most English speakers start with, now with games	1
French	learn french · french for beginners · french practice	apprendre en jouant · jeux de vocabulaire	Everyday French, learned five minutes at a time	2
Japanese	learn japanese · japanese words · japanese games	語学学習 · 単語ゲーム	Japanese vocabulary that sticks, because you play it	3
German	learn german · german vocabulary · german app	sprachen lernen · vokabeln lernen	German words drilled through ten games	4
Italian	learn italian · italian for beginners	imparare giocando · giochi di vocaboli	Italian for travel, built as a game	5
Portuguese	learn portuguese · portuguese words	aprender brincando · jogos de vocabulário	Portuguese vocabulary, one game at a time	6
Chinese	learn chinese · chinese vocabulary	学语言 · 单词游戏	Chinese words through play — script support unverified	7
Turkish	learn turkish · turkish words	dil öğrenme · kelime oyunu	Turkish vocabulary, game-first	8
Arabic	learn arabic · arabic for beginners	تعلم اللغات · ألعاب تعلم اللغة	Arabic vocabulary through games — RTL unverified	9
Dutch	learn dutch · dutch vocabulary	talen leren · spelenderwijs leren	Dutch words, learned by playing	10

Where to spend first RECOMMENDATION

Spanish, French and Japanese.

- Spanish** — the largest learn-a-language demand in the English-speaking world, and LingoQuest's most complete course (it is the reference course every other one was generated against).

- **French** — second-largest English-speaker demand, and the French course is the only other one with content beyond the base generation pass.
- **Japanese** — smaller volume, but the audience skews young, game-literate and app-native, which is precisely the segment a games-first pitch converts best. It is also where "learn through games" faces the least entrenched competition.

Arabic and Chinese are deliberately *not* in the first three. Both need script handling and right-to-left support that I did not verify, and both carry a higher risk of a one-star review for a rendering fault than they carry upside.

18 Localisation strategy

THE DEPENDENCY THAT GOVERNS THIS SECTION

Apple and Google both let you localise a listing without localising the app. Doing that here would put a Spanish-language store page in front of a Spanish speaker who then opens an English-only interface teaching Spanish *from* English. That is a refund, a one-star review, and a permanent dent in the listing's conversion rate.

Three tiers RECOMMENDATION

TIER	LOCALES	ACTION NOW	UNBLOCKS WHEN
A — ship now	en-US, en-GB, en-AU, en-CA	Full metadata, all 10 screenshots, preview video	Live at launch
B — metadata only	nl-NL, de-DE, sv, da, nb	Localised <i>subtitle and keywords only</i> , English description and screenshots, with "English-language app" stated in the first description line	Optional at launch; markets with high English proficiency where the honesty note is enough
C — hold	es, fr, it, pt-BR, tr, ar, ja, zh-Hans	Nothing. Research is banked in \$16	Interface localisation + native-language glosses ship

Localised titles and subtitles for Tier C are drafted below so they are ready the day the dependency clears — they are **not** for upload now.

TIER C DRAFTS • HOLD UNTIL LOCALISATION SHIPS				
LOCALE	TITLE (≤30)	SUBTITLE (≤30)	PRIMARY TERMS	SHORT DESCRIPTION
es-ES / es-MX	LingoQuest: Juegos de Idioma	Aprende jugando cada día	aprender idiomas, aprender jugando, juegos de vocabulario	Aprende español, francés y 8 idiomas más con 10 juegos de palabras.

fr-FR	LingoQuest : Jeux de Langue	Apprendre en jouant	apprendre une langue, en jouant, vocabulaire	Apprends l'espagnol, le japonais et 8 autres langues avec 10 jeux de mots.
it-IT	LingoQuest: Giochi di Lingua	Impara giocando ogni giorno	imparare le lingue, giocando, vocaboli	Impara spagnolo, francese e altre 8 lingue con 10 giochi di parole.
pt-BR	LingoQuest: Jogos de Idiomas	Aprenda brincando todo dia	aprender idiomas, jogos, vocabulário	Aprenda espanhol, francês e mais 8 idiomas com 10 jogos de palavras.
tr-TR	LingoQuest: Dil Oyunlari	Oyunla dil öğren	dil öğrenme, kelime oyunu	İspanyolca, Fransızca ve 8 dil daha — 10 kelime oyunuyla öğren.
ar	لينجوكريست: ألعاب اللغة	تعلم اللغات باللعب	تعلم اللغات, ألعاب الكلمات	تعلم الإسبانية والفرنسية و8 لغات أخرى عبر 10 ألعاب كلمات.

LOCALE	TITLE (≤30)	SUBTITLE (≤30)	PRIMARY TERMS	SHORT DESCRIPTION
ja-JP	LingoQuest 言葉のゲーム	遊びながら語学学習	語学学習, 単語ゲーム	スペイン語や日本語など10言語を、10種類の単語ゲームで学ぼう。
zh-Hans	LingoQuest 语言游戏	玩游戏学语言	学语言, 单词游戏	用10款单词游戏, 学习西班牙语、法语等10种语言。

None of these is a literal translation. "Aprender jugando" and "spielerisch lernen" are the phrases those markets actually use for play-based learning; a direct rendering of "Language Games" would read as a games catalogue in both.

19 Country strategy

Ranked on English-language serviceability first, because that is the hard constraint, then on paid-subscription behaviour. ESTIMATE

TIER	MARKETS	WHY	LAUNCH ACTION
Tier 1	United States, United Kingdom, Canada, Australia	Native English, highest iOS subscription spend, and the entire "learn Spanish / French / Japanese" demand base LingoQuest is built to serve	Full listing, preview video, Apple Search Ads on brand + games terms
Tier 2	Netherlands, Sweden, Denmark, Norway, Ireland, Singapore, New Zealand	Very high English proficiency, strong iOS share and subscription willingness; an English UI is not a blocker here	English listing, Tier-B localised subtitle where \$18 allows, organic only
Tier 3	Germany, France, Spain, Italy, Brazil, Japan, Turkey, UAE	Large demand but the English-only UI is a real conversion and retention penalty	Hold paid spend. Revisit the day interface localisation ships

ONE DELIBERATE EXCEPTION

India and the Philippines sit outside this ranking. English proficiency is high and volume is large, but subscription conversion is materially lower. They are worth including for install volume and review velocity at launch, and worth excluding from any revenue forecast built on Tier 1 conversion rates.

20 A/B test plan • 20 experiments

Ordered by expected impact. Run one variable at a time on the icon and first three screenshots; everything else can run in parallel.

PRODUCT PAGE OPTIMIZATION (IOS) & STORE LISTING EXPERIMENTS (PLAY)					
#	HYPOTHESIS	VARIANT A (CONTROL)	VARIANT B	PRIMARY METRIC	SUCCESS
1	A games-first icon out-converts a teaching-first icon	Full-body parrot with pointer, green ground	Head-and-shoulders parrot, amber ground, no pointer	Impressions → product page view	+8% tap-through
2	Leading with gameplay beats leading with the dashboard	Screenshot 1 = Home dashboard	Screenshot 1 = Word Bubble gameplay	Product page → install	+5% conversion
3	Naming the count beats naming the category	Subtitle "Learn Spanish, French & 8 More"	Subtitle "10 Languages, 10 Word Games"	Install rate + keyword rank	+4% conversion
4	"Games" in the title lifts non-brand discovery	Title "LingoQuest: Language Games"	Title "LingoQuest: Learn by Playing"	Non-brand impressions	+10% impressions
5	Breadth earlier compensates for a weak opener	Order 1-2-3 as shipped	Languages screen promoted to #2	Scroll depth + install	+3% conversion
6	A video raises conversion more than it costs attention	Screenshots only	Preview video autoplaying first	Product page → install	+6% conversion
7	Play-based wording beats study-based wording	"Short lessons that stick"	"Lessons you play, not study"	Install rate	+3% conversion
8	Trial framing beats price framing on the CTA	"Upgrade to Pro"	"Start my 3 days free"	Paywall → purchase	+12% trial starts

#	HYPOTHESIS	VARIANT A (CONTROL)	VARIANT B	PRIMARY METRIC	SUCCESS
9	A concrete streak number beats an abstract habit claim	"Keep the streak alive"	"Keep a 24-day streak alive"	Scroll depth to #10	+2% conversion
10	Ten games beats one named game	Screenshot 5 = games grid	Screenshot 5 = Word Bubble close-up	Install rate	+3% conversion
11	Mistake review is an underrated selling point	Review screenshot at #7	Review screenshot at #3	Install rate	+3% conversion
12	Price in the description reduces paywall bounce	No price in description	"\$30/year" in first 3 lines	Paywall bounce rate	-8% bounce
13	Naming specific games lifts long-tail rank	Generic "10 games"	Game names listed in Play long description	Play keyword rank	Top-50 on 5 new terms
14	A darker first frame stands out in a light carousel	Screenshot 1 light green	Screenshot 1 deep green	Tap-through	+4% tap-through
15	Progress proof beats feature breadth for returning visitors	Statistics at #9	Statistics at #4	Install rate	+2% conversion
16	The mascot helps more on the page than in the tile	Mascot in icon and screenshot 1	Mascot removed from screenshot 1	Conversion	No loss (guardrail test)
17	"Free to download" raises installs without hurting trials	No free claim	"Free to download" on screenshot 10	Install rate	+5% installs, flat trial rate
18	A shorter video holds more viewers to the end	26.7s preview	15s cut: hook, one game, CTA	Video completion	+15% completion
19	Placement test reassures experienced learners	No mention	"Skip ahead with a placement test" in description	Install rate among 25-44	+3% conversion
20	Per-language progress is a differentiator worth stating	"10 languages"	"10 languages, each with its own streak"	Install rate	+3% conversion

SEQUENCING

Tests 1–4 change what a person sees before they read anything, so they move the number most and should run first. Do not run the icon test and the screenshot-1 test concurrently — both change the search-result tile, and you will not know which one moved it.

21 90-day roadmap

Days 1–14

Fix the two blockers

Redesign the icon per §10. Verify offline behaviour and the speaking exercise so both can enter the copy — or stay out of it permanently. Configure the three subscription products and the 3-day trial in both consoles.

Days 15–30

Ship the listing

Upload the ten screenshots, the preview video and the Tier-1 metadata. Publish to US, UK, CA, AU. Baseline impressions, product-page views, conversion and day-1/day-7 retention before spending anything.

Days 31–45

Learn before spending

Run A/B tests 1–4 sequentially. Read the keyword-rank baseline for the games cluster in §16. Do not start Apple Search Ads until test 2 has a result — the screenshot order changes what the ad is selling.

Days 46–60

Close the content gap

Extend the top three courses past three units. Nine lessons cannot support the 30-day streak badge the app already advertises, and retention data from days 15–30 will show exactly where learners fall off.

Days 61–75

Scale what worked

Apply the winning icon and screenshot order everywhere. Open Tier-2 markets organically. Begin Search Ads on brand plus the games cluster only — never on head terms the incumbents own.

Days 76–90

Decide on localisation

With retention and conversion from a full quarter, decide whether interface localisation earns its cost. If yes, Spanish first: it is the biggest course, the biggest market and the fastest to validate.

22 Final recommended package

If I were launching LingoQuest with my own money, this is exactly what I would publish.

THE PACKAGE	
SLOT	SHIP THIS
App Store title	LingoQuest: Language Games
Subtitle	Learn Spanish, French & 8 More
Keywords	vocabulary, word, game, practice, quiz, speak, listen, italian, german, japanese, arabic, dutch, turkish
Screenshots	All ten, in the order in §7 — the games frame at #2 is the whole bet
Preview video	LingoQuest_AppStore_Preview_iPhone.mp4 — 26.5s, iPhone geometry, real gameplay, silent
Icon	Redesign before launch. Head-and-shoulders on amber. This is the one asset I would not ship as-is
Markets	Tier 1 at launch, Tier 2 organic, Tier 3 held
Localisation	English only, until the interface is localised
Price	\$12/mo with 3-day trial, \$30/yr — under every competitor in §4

The one thing I would fix before any of it

Nine lessons per language is three units. A learner who takes the app at its word and builds a streak will exhaust Spanish inside a fortnight, and the achievements screen is advertising a 30-day streak badge they cannot earn on content alone. Every pound spent on ASO before that gap closes is buying installs into a leaky bucket.

Ship the store package as specified, hold the paid acquisition until there is enough content to survive the streak the app is selling.

LingoQuest launch dossier · compiled 12 September 2026 from the running build. Facts sourced from the live App Store listings and Apple/Google published limits, each linked inline. Competition, opportunity and score columns are assessments, not measurements. No search-volume, download or revenue figures are estimated anywhere in this document.
